

Programmable SMS

Programmable SMS has the features you need to quickly build and scale texting applications – and place them into production. RestcommONE provides a complete solution for messaging at all layers of the telecom protocol and application stack. This includes SMS and SIP messaging.

See how we can help you succeed.

Two-way SMS

Send and receive SMS, broadcast SMS, group SMS and shortcodes to users and networks worldwide.

Bulk Messaging

Broadcast messages to all of your users for events, app invites, location sharing and more.

Features

Message Queueing

Send a high volume of messages with a single API request. We queue your SMS messages and deliver them for you.

Delivery Reports

Get real-time business intelligence from our live delivery reports for all your SMS text messages sent.

Real-time SMS Notifications & Logs

Fetch your SMS logs in real-time with our APIs. Receive detailed information including message direction, message status, API log reports, and message time stamps.

Bulk Messaging

SMS APIs support multiple outbound SMS text messaging with a single API request.

Push Notifications

RestcommONE offers iOS and Android WebRTC SDKs with built-in support for push notifications capabilities. We also have a well-documented REST API for push notifications and the back end services to send them to millions and millions of devices. This feature is currently in Preview.

Unicode Characters

RestcommONE supports Unicode UTF-8 to send and receive SMS text messages in the most used languages including Chinese, Japanese, French, Arabic and symbol script such as emojis.

Message Federation

The RestcommONE Message Exchange service seamlessly supports SMS text messages to be sent to and received from individuals outside closed business chat platforms and UC/UCaaS systems. Unifying

these environments with the outside world keeps business contacts in the company directory and conversations on the company network as it should be. No more using a personal mobile device to send business messages. The Message Exchange service is included with the RestcommONE platform.
